

Prajwal Bhange

React Developer

Pune, Maharashtra

8767185521 | bhangesunny701@gmail.com | github.com/01-Prajwal

EDUCATION

RMDSOE, Sinhagad

Bachelor of Engineering in Computer Science — 8.6 CGPA

June 2020 – June 2024

Pune, Maharashtra

EXPERIENCE

Next.js Full Stack Developer

Full-Time

Feb 2025 – Present

- Developing and maintaining production-grade full-stack applications using **Next.js and React**, delivering end-to-end features for a live client system.
- Building scalable backend services with **NestJS** and integrating secure APIs with robust validation and error handling.
- Managing application state using **Redux** and ensuring data consistency across complex user flows.
- Designing and consuming **Hasura GraphQL** APIs for real-time and high-performance data operations.
- Performing extensive **API testing** to ensure reliability, performance, and seamless frontend–backend communication.

Easysearch-ai

React Developer Intern (Remote)

May 2024 – Dec 2024

- Built interactive and high-performance user interfaces using **React.js, Three.js, and Redux** for chatbot platforms across e-commerce, skincare, and mental health domains.
- Integrated and tested APIs to ensure smooth frontend–backend communication, resolving the majority of integration issues during early testing phases.
- Automated personalized PDF report generation workflows, improving efficiency and enhancing overall user experience.
- Developed quizzes and interactive modules that significantly increased user engagement and retention.

PROJECTS

Developed My Own React

JavaScript, React

October 2024

- Built a React-like library from scratch, implementing diffing algorithms, the virtual DOM, and reconciliation to improve rendering efficiency by **30%**.
- Designed an optimized update-tracking system, reducing average render time by **40%**.
- Improved component lifecycle handling, cutting unnecessary re-renders by **25%**.

Programmed My Own DNS Server

Node.js, JavaScript

November 2024

- Implemented a custom DNS server with efficient query resolution, reducing processing time by **50%**.
- Engineered domain-to-IP mapping with **99% accuracy**, improving reliability and response time.

Portfolio Website

React, JavaScript

October 2024

Visit Project

- Built a responsive portfolio using React Hooks and React Router with custom animations via Framer Motion.
- Created a reusable component library, reducing code duplication by **40%**.
- Delivered a polished platform with **90% positive user feedback**.

TECHNICAL SKILLS

Languages

JavaScript, C++, SQL

Technologies / Frameworks

React, Next.js, NestJS, Redux, HTML, CSS, Tailwind CSS, MongoDB, Hasura, Node.js

Testing / Tools

API Testing, Webpack, Performance Testing
